

The background is a textured brown paper. It features faint, stylized line drawings of various nuts and nut products. In the top left, there's a cluster of walnuts. In the top right, there's a single almond and a walnut. On the left side, there's a large almond and a walnut. In the bottom left, there's a walnut. In the bottom right, there's a bowl filled with walnuts and almonds.

COMPANY

Uninterrupted Service – Quality Product – Reasonable Prices

File Gıda, which was established in **1984**, has been growing its investments day by day and steadily expanding its business volume. It carries out its production in its modern factory with its experienced personnel.

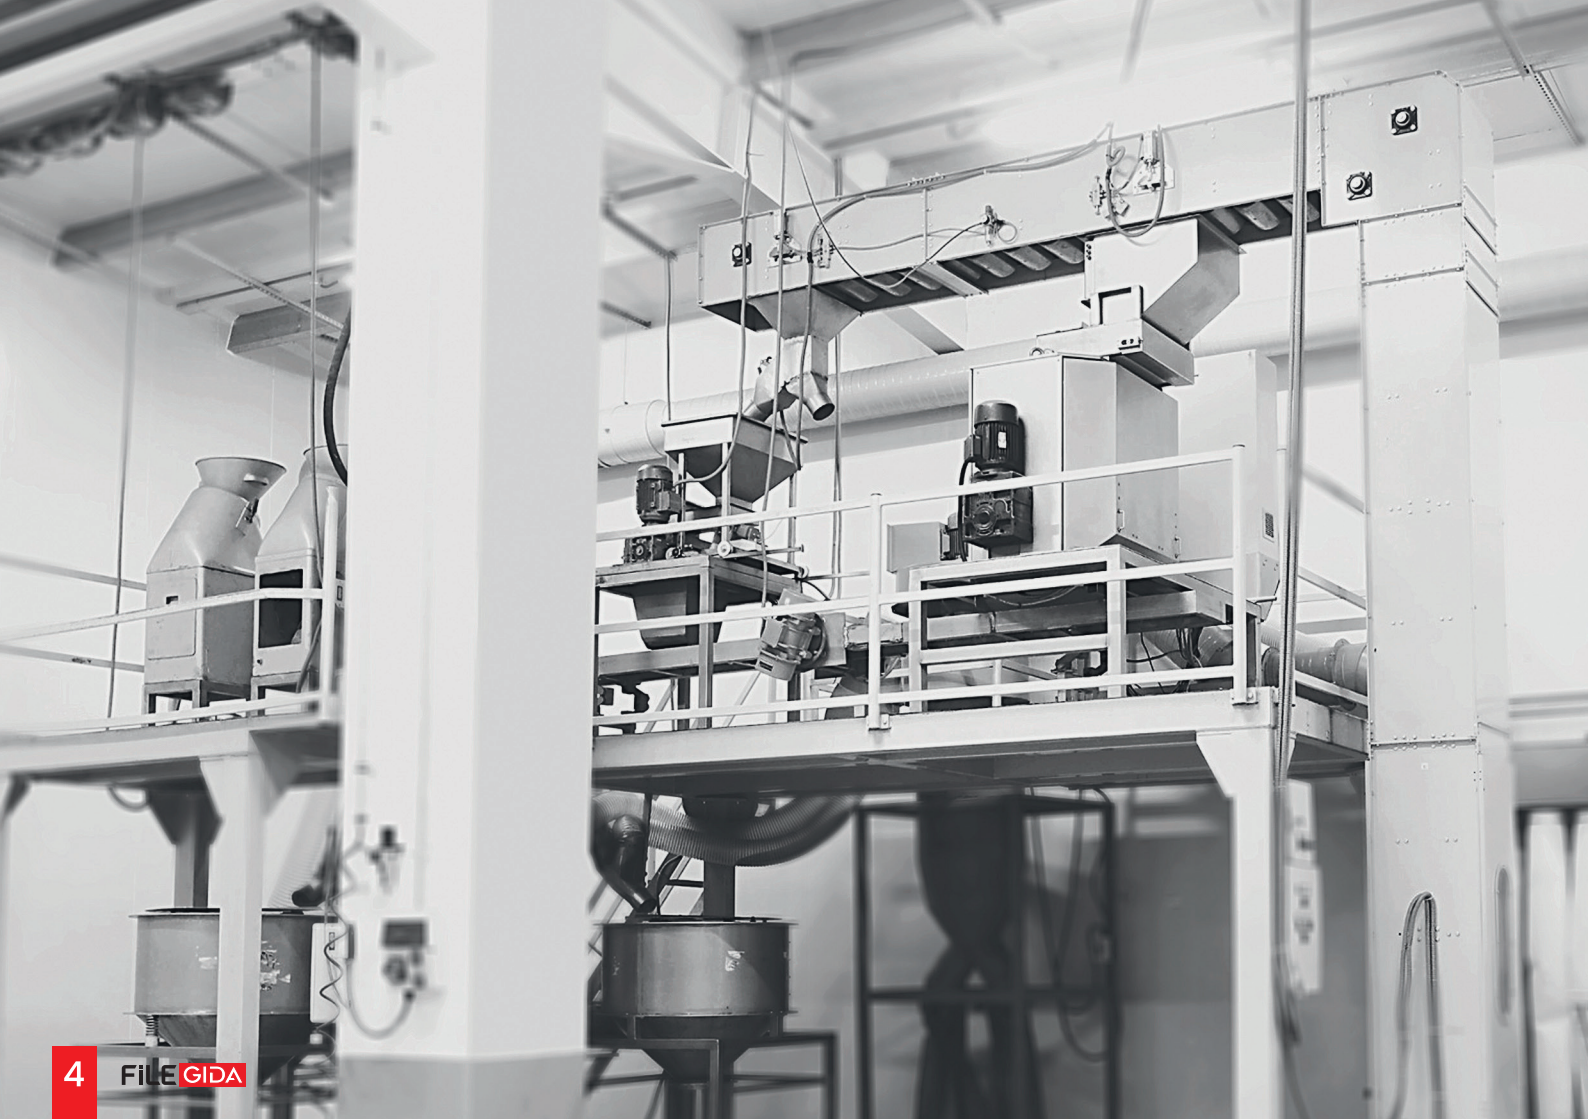

File Gıda, which produces with the latest technological machines in its factory, always prioritizes its customers' quality product and reasonable price policy.

SINCE **1984**

We have been doing our family business with experienced professionals for 3 generations.

It is our duty to always do the best for our customers who prefer our company.

We
produce
with the latest
technologies.

WORLD MARKET QUALITY EXPORT

With years of experience, we buy
the best quality raw materials
from all over the world in accor-
dance with our specifications.

We serve all our customers around the world on time,
with high quality and reasonable prices.

Product Safety and Quality

File Gıda makes production in accordance with international quality standards in determining the production processes. Thus, File Gıda has many important certificates in the international market such as **FSSC 22000**. And it continues its production in line with this document. Accordingly, our quality team can perform physical, chemical and microbiological analyzes.

RESEARCH AND DEVELOPMENT

FOR FOOD SAFETY STANDARDS

High quality means food safety and sustainability for us.

We invest in the continuous research of the latest technology and systems that enable it to process products, so that we guarantee our customers a thoroughly pure final product. Our expert and professional team analyzes and examines quality in our laboratories. It can monitor and control all processes from raw material product entry to shipment process.

We also state that we are open to audits by our customers in order to improve ourselves even more. And in this way, our research and development department is working with all its strength to reduce the costs of our company and increase the quality...
